

Environmental Policy and General Requirements

GENERAL

The main business of Herongrange Group is to provide static security guarding services, Key Holding, Alarm response and Mobile Patrols. With few exceptions we do not carry out processes that are detrimental to the environment or cause pollution in the execution of our business both within our own office premises or while on site at our customer's premises.

We have however identified three areas of our business in which we can make an impact.

- Head office function
- The travel to work and monitoring of our staff in our customers premises.
- The use of consumables on our customer's sites.

Herongrange Group undertakes to comply with all environmental legislation and regulation that is appropriate to our business.

Herongrange Group will ensure that all Managers and Staff are aware of this policy and are given every reasonable facility to adhere to them and will be available to all employees via the companies' notice boards.

We are committed to leading the industry in minimising the impact of our activities on the environment.

The key points of our strategy to achieve this are:

- Minimise waste by evaluating operations and ensuring they are as efficient as possible
- Minimise toxic emissions through the selection and use of our fleet and the source of its power requirement.
- We will actively promote recycling both internally and amongst our customers and suppliers.
- We will meet or exceed all the environmental legislation that relates to the company.

Signed on behalf of the Company

David Kane
